

California OES Weather Threat Briefing

Wednesday, June 9, 2021
9:00 AM PDT

Day 1 (Wednesday): Windy weather expected across the Sierra and southern deserts this afternoon and evening, with elevated to critical fire weather conditions also likely for much of eastern California and localized fire weather concerns across the southern California mountains

National Weather Service

Regional Operations Center
Salt Lake City, UT*

WEATHER KEY POINTS

06/09/21 - 06/15/21

Wednesday

- Elevated to critical fire weather conditions persist one more day across the eastern Sierra slopes and inland southern deserts where south winds 20-35 mph with gusts to 60 mph are expected.
 - Any new fires could spread quickly in these conditions
- Cooler temperatures continue through midweek for the majority of the state
- Scattered showers and thunderstorms expected across far northern California this afternoon and evening, though overall rainfall amounts will generally be light. A few storms could produce some small hail.
- Some areas of fog expected again across coastal southern California tonight through Thursday morning

Thursday - Tuesday

- Elevated fire weather conditions may also return Sunday through Tuesday, with locally gusty winds over the Sierra
- Some additional light showers are possible across far northwest California Friday through the weekend, though rainfall amounts look to be less than one-tenth of an inch
- Warmer temperatures make a return for much of the state through the weekend and early next week
 - Temperatures across southeastern California will significantly increase early next week, likely bringing significant heat impacts to the region

CALIFORNIA WEATHER IMPACTS

06/09/21 - 06/15/21
